

How to Layer Jewelry

Use color or theme as the anchor.

Mix high-contrast styles like earthy beads, mother-of-pearl, and crystals.

Delicate chains can be layered with chunky beads, and you can wear silver with gold. Break all the old fashion rules and layer different styles for brand new looks.

Let your metals mingle using clean, graphic shapes to pull the look together. The result is very of-the-moment.

A beautiful sculptural cuff is totally chic on its own, but adding bangles, beads, or links makes the look really modern.

Make a simple color story with elements like black, silver, and stones. Add one vibrant color to create an eye-catching contrast.

Partner big and bold jewels. Just be sure they lie at different lengths so that each one stands out.

Layer delicate pieces like a personal charm necklace, a strand of stones, and crystal beads – it's a sweet and pretty combination.
